**Document Signing**

PKI certificates secure documents in transit, preventing tampering. A secured document also proves the authenticity of the author, validating their identity so the recipient knows they’re communicating with the right person.

**Unsecure document signing - unsigned document**

Sender → Document in transit → Recipient

Results
- No verification or authentication
- Non-compliant in many industries

**Secure digital document signing**

Sender → Digital signed document in transit → Recipient

Verifies with public key

Results
- Certifies documents
- Prevents tampering
- Establishes author
